

Labsheet 4.1**Stair Measurement Table**

- A. 1.** Determine the steepness of a set of stairs in your school or home. To calculate the steepness you will need to:
- measure the rise and run of at least two steps in the set of stairs.
 - make a sketch of the stairs, and label the sketch with the measurements you found.
 - find the ratio of rise to run.

	Rise	Run	Ratio of Rise to Run	Sum of Rise and Run
Step 1				
Step 2				
Step 3				
Step 4
